

STS Quality Policy

STS Sensor Technik Sirnach AG develops, manufactures and sells pressure measurement solutions. The quality management system includes the companies in Switzerland, Germany, Italy, France and Great Britain.

The foundation of the STS business is the high quality and reliability of our products. The constantly growing requirements of our customers, the pressure of the competition and the continuous evolution of our technologies and manufacturing processes challenge us to constantly improve the quality.

We want to

- maintain a quality management system in accordance with ISO 9001 in order to always deliver to our customers the products that meet their demands;
- promote a corporate culture, in which errors and risks are addressed openly in order to determine the root causes and implement sustainable solutions to eliminate them;
- maintain and promote the quality awareness of our qualified staff through continuous information, training and instruction;
- manufacture repeatably and efficiently by means of unambiguous product specifications and written operating procedures;
- choose suitable suppliers and partners in order to optimize the value chain in terms of performance and price;
- meet the increasing requirements of our customers through continuous improvements to our products and processes.

Responsibilities

The executive board and the head of quality management determine the quality policy and the quality goals. The members of the executive board ensure good framework conditions and assume responsibility for the achievement of the quality goals within their domains. The head of quality management supports them and is responsible for the issues of quality management and quality assurance.
